

The heatmap displays a 9x9 grid of values. The x and y axes are both labeled from 0 to 8. A color bar on the right indicates the value scale from 0 (dark purple) to 5 (bright yellow). The grid shows a pattern of values, with the highest values (yellow, 5) appearing in the center-right region, and the lowest values (dark purple, 0) appearing in the corners and along the edges.
